

PRINCE KANANI

Product Manager | SaaS | Tally Integration | Web & Mobile Apps

Ahmedabad, Gujarat, India • princekanani4@gmail.com • +91-8487802956 • linkedin.com/in/prince-kanani-312a79230

PROFESSIONAL SUMMARY

Product Manager at Honest IT building real-world SaaS products that solve business problems for SMEs and enterprises across India. Specializes in AI-assisted product development — using Claude to design, build, and ship full applications without traditional hand-coding. Currently managing Intallysense (live Tally accounting data on web, Android, and iOS) and leading development of an ERP Finance Module. Hands-on experience in client implementation, testing, and project delivery through work on the Minda project. Focused on turning business requirements into shipped products quickly using modern AI tools.

CORE COMPETENCIES

- **Product:** Software Product Management, Roadmap Planning, Requirement Gathering
- **AI Building:** AI-Assisted App Development with Claude, Rapid Prototyping, LLM-Powered Workflows
- **Delivery:** Project Implementation, Client Communication, Testing & QA, Requirement Gathering
- **Domains:** SaaS, Tally Integration, Asset Management, ERP Finance, Web & Mobile Apps (Android, iOS)
- **Technical Exposure:** Familiar with C#, ASP.NET, .NET Core, PHP, SQL (supporting engineering discussions)
- **Tools:** SQL Server, DevExpress XAF, Twilio (SMS), Barcode/QR Integration, Microsoft Office
- **Soft Skills:** Stakeholder Communication, Cross-Functional Teamwork, Time Management, Multitasking

PROFESSIONAL EXPERIENCE

Honest IT — Product Manager

Jan 2026 – Present

Ahmedabad, Gujarat, India • Full-time, On-site

- Leading product development for two key SaaS products serving SMEs and enterprises across India.
- Independently designed and built the Intallysense application using Claude — owning requirements, UX, and implementation without a traditional dev team dependency.
- Currently leading an ERP Finance Module, again using AI-assisted development with Claude to accelerate delivery.
- Managing Asset Management — an enterprise platform to track, manage, and optimize physical and digital assets across departments and locations.
- Writing clear product requirements, prioritizing features, and coordinating delivery across client and technical stakeholders.

Honest IT — Support Executive

Apr 2025 – Present

Ahmedabad, Gujarat, India • Full-time, On-site

- Worked on the Minda client project end-to-end — covering project implementation, on-site testing, and ongoing client communication.
- Responsible for understanding client requirements, walking through product features, and ensuring smooth go-live of deployed solutions.
- Performed functional testing and UAT coordination to catch issues before client sign-off.
- Delivered prompt support to enterprise clients, resolving issues and documenting outcomes using Microsoft Word and PowerPoint.
- Built strong client-handling, troubleshooting, and communication skills through real implementation work.

Honest IT — Software Development Intern

Jan 2025 – Apr 2025

Ahmedabad, Gujarat, India • Full-time, On-site

- Gained hands-on exposure to enterprise software development using ASP.NET, .NET Core, and C# — building foundational understanding that now supports product and requirement decisions.

KEY PRODUCTS & PROJECTS

Minda Project — Client Implementation *Testing • Go-Live • Client Communication*

- Hands-on role in implementing Honest IT solutions for Minda, a major enterprise client.
- Led functional testing, coordinated with the client on requirements, and supported go-live and post-deployment issue resolution.

Intallysense — Tally Integration SaaS (Built with Claude) *Web • Android • iOS*

- Platform that brings live Tally accounting data to web and mobile apps, giving business owners real-time financial visibility on the go.
- Designed and developed the application using AI-assisted development with Claude — accelerating delivery while maintaining production-grade quality.
- Owned product vision, requirements, and technical execution end-to-end across web, Android, and iOS.

ERP — Finance Module — Enterprise SaaS (In Progress) *Web Application*

- Currently designing and developing a finance module for an enterprise ERP system covering accounting, ledgers, and financial reporting.
- Building with AI-assisted development using Claude to accelerate delivery, maintain code quality, and reduce iteration time.

Asset Management Platform — Enterprise SaaS *Web Application*

- Enterprise platform to track, manage, and optimize physical and digital assets across departments and locations.
- Features include barcode/QR scanning, real-time tracking, and ERP integration.

Ticketing System — Internal Project *ASP.NET Core • Blazor • EF Core • DevExpress XAF*

- Ticket creation with priority, department routing, and attachments; status tracking (To Do / In Process / Done).
- Threaded comments between users and departments, plus sprint planning with story points.

Cloth Sale Online — eCommerce Website *PHP • HTML • CSS • MySQL*

- Full-stack clothing store with product listings, shopping cart, purchasing, and automated email confirmations.

EDUCATION

LJ University — Master of Computer Applications (MCA) *Jun 2023 – Jul 2025*

RK University — Bachelor of Computer Applications (BCA) *2020 – 2023*

TRAINING

- PHP Developer Training — YR Coder (Aug 2023 – Dec 2023)

KEY STRENGTHS

- Ships real products using AI tools — takes ideas from requirement to working app without relying on a traditional dev team.
- Strong client-facing skills in implementation, testing, and communication (e.g., Minda project).
- Practical, outcome-driven, and adaptable — focused on shipping software that solves real business problems.
